

PRESSURE AND FLOW RECORDING

Küchler
Technik

kuechler-technik.ch

DATA RECORDED

- Quantity (mortar or cement) pumped liters
- Flow rate (mortar or cement) in liters per hour (ℓ/h)
- Pressure in bar
- Site details (construction site, customer, hole number)
- Date / time

FUNCTIONS

- Automatic stop of the measurement and the injection system using maximum pressure and quantity.
- Pump control via contact switch
- Measurement pause
- Download to USB and evaluation in specialized software with database function
- Languages German, English, French, Italian
- Touch-screen operation
- Controlling the injection system, e.g. K MUNG®
- adding water (W/F-factor)

SPECIFICATIONS

- Measuring range flow rate
1–10 000 liters per hour (ℓ/h)
- Power supply 220 V 50 Hz
- max. pressure 100 bar
- Measuring accuracy 0.5%

EVALUATED DATA

Overview

Evaluation

TOUCH-SCREEN OPERATION

MEASUREMENT RECORD

COMPATIBILITY

Compatible with various injection devices

Further details can be found in the following documents:
